

Malaysia's number one Filing solution becomes even better with Fortisco shelving

FILEforce– Kuala Lumpur

When FILEforce Malaysia wanted to expand their very successful range of office filing solutions to include a more high-density mobile systems they contacted Fortisco. The two companies agreed to work together and develop a high quality complete filing solution incorporating the proven FILEforce 'Ladder Rack' with the Fortisco's S2S and Hand Driven mobile systems. The result of this combination has provided FILEforce with superb high quality static Ladder Racks as well as the opportunity to provide their clients with a complete turnkey high density filing solution. FILEforce have now installed the full range of their filing solutions in their refurbished showrooms in Kuala Lumpur.

Static Ladder Racks with full bay-to-bay access complete with pullout reference shelves

Ladder Racks mounted on S2S mobile bases positioned in front of a static rack providing double deep filing capacity

First impressions are so important when walking into a company

Ergonomically designed full length molded handles provide easy access to any

Hand Driven mobiles incorporating ladder racks for suspended files and standard shelving for general storage. The stunning scene depicted on the front finishing panels not only creates immediate attention, but also provides the showroom a bright and friendly environment to entertain clients.
