

Flexible mobile storage Solution for new TV centre

Sony, Turkmenistan

When Sony Professional Solutions – Europe, in conjunction with Kulu Productions Ltd, developed a new TV Centre in Turkmenistan, the problem was not only sourcing a company who could provide a storage solution for over 35,000 discs & tapes of various sizes, but also provide an installation service for a site 3000 miles from the UK.

Fortisco and our UK partners Office Storage Solutions were contacted and following meetings at Sony HQ in the UK, a Mobile Storage System was designed and developed to accommodate 3 sizes of Discs & Tapes, which not only met the clients requirements, but provided additional storage capacity for future growth.

The system was manufactured within 3 weeks, checked and double-checked before packing for export and delivered to Sony, Basingstoke, all the components were then flown to Turkmenistan.

**First impressions are so important
when walking into a company**

Fully trained engineers were flown to the site in Ashgabat and the Mobile System was installed in 3 days, without any problems arising and to the client's full satisfaction.
